| Cat.#: DF4562<br>Size: | Concn.: ~1mg/ml<br>Source: Rabbit                                                                                                                              | Mol.Wt.: 60 KD<br>Clonality: Polyclonal |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| Application:           | WB 1:500-1:1000, IHC 1:50-1:200, IF/ICC 1:100-1:500<br>*The optimal dilutions should be determined by the end user.<br>Human,Mouse,Rat                         |                                         |
| Reactivity:            |                                                                                                                                                                |                                         |
| Storage:               | Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from date of receipt. |                                         |
| Purification:          | The antiserum was purified by peptide a SulfoLink™ Coupling Resin (Thermo F                                                                                    |                                         |
| Immunogen:             | A synthesized peptide derived from hur region within the internal amino acids.                                                                                 | nan CCT6A, corresponding to a           |
| Uniprot:               | P40227                                                                                                                                                         |                                         |

Western blot analysis of extracts from HepG2 cells, using CCT6A Ab.The lane on the left was treated with the antigen-specific peptide.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
