## IFNB1 Ab

References(3) Images(4)

Cat.#: DF6471 Concn.: ~1mg/ml Mol.Wt.: 22kDa
Size: Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000, IHC 1:50-1:200

\*The optimal dilutions should be determined by the end user.

Reactivity: Human, Mouse, Rat

Storage: Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02%

sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from

date of receipt.

Purification: The antiserum was purified by peptide affinity chromatography using

SulfoLink<sup>TM</sup> Coupling Resin (Thermo Fisher Scientific).

Immunogen: A synthesized peptide derived from human IFNB1, corresponding to a

region within the internal amino acids.

Uniprot: P01574

Description: The genes encoding type I interferons (IFNs), which include 14 IFN- genes,

one IFN-? gene, one IFN-w (also known as IFN- II1) gene, and a number of IFN-w pseudogenes, are clustered on human chromosome 9. Interferons- and -? are cytokines that are widely known to induce potent antiviral activity. IFN- and -? exert a variety of other biological effects, including antitumor and immunomodulatory activities and are increasingly used clinically to treat a range of malignancies, myelodysplasias and autoimmune diseases. IFN-w is antigenically different from human IFN-, IFN-? or IFN-, but is a component of natural mixtures of IFN species produced by virus-

induced leukocytes or Burkitt's lymphoma cells.

DF6471 at 1/100 staining Rat brain tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the primary Ab at  $4^{\circ}\text{C}$  overnight. An HRP conjugated anti-Rabbit Ab was used as the secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween@20 at 4°C with gentle shaking, overnight.
