## CX3CR1 Ab

Images(2)

Cat.#: DF7096 Concn.: ~1mg/ml Mol.Wt.: 44kDa Size: Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-2000, IF/ICC 1:100-1:500

\*The optimal dilutions should be determined by the end user.

Reactivity: Human, Mouse, Rat

Storage: Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02%

sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from

date of receipt.

Purification: The antiserum was purified by peptide affinity chromatography using

SulfoLink<sup>TM</sup> Coupling Resin (Thermo Fisher Scientific).

Immunogen: A synthesized peptide derived from human CX3CR1, corresponding to a

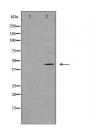

region within N-terminal amino acids.

Uniprot: P49238

Description: Fractalkine is a transmembrane protein and chemokine involved in the

adhesion and migration of leukocytes. The protein encoded by this gene is a receptor for fractalkine. The encoded protein also is a coreceptor for HIV-1, and some variations in this gene lead to increased susceptibility to HIV-1 infection and rapid progression to AIDS. Four transcript variants encoding

two different isoforms have been found for this gene.

Western blot analysis of extracts from mouse fetal muscletissue lysates, using CX3CR1 Ab. The lane on the left was treated with the antigen-specific peptide.

DF7096 staining Hela cells by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab(Red), diluted at 1/600 was used as secondary Ab.

in 5%  $\mbox{w/v}$  milk , 1% TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
