## TCF7 Ab

Images(1)

Cat.#: DF7179 Mol.Wt.: 42kDa Concn.: ~1mg/ml Size: Source: Rabbit Clonality: Polyclonal

WB 1:500-1:1000, IF/ICC 1:100-1:500 Application:

\*The optimal dilutions should be determined by the end user.

Human, Mouse, Rat Reactivity:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% Storage:

sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from

date of receipt.

Purification: The antiserum was purified by peptide affinity chromatography using

SulfoLink™ Coupling Resin (Thermo Fisher Scientific).

A synthesized peptide derived from human TCF7, corresponding to a region Immunogen:

within N-terminal amino acids.

P36402 Uniprot:

Description: The protein encoded by this gene is a transcriptional activator that plays an

important role in lymphocyte differentiation. This gene is expressed

predominantly in T-cells. The encoded protein can bind an enhancer element and activate the CD3E gene, and it also may repress the CTNNB1 and TCF7L2 genes through a feedback mechanism. Several transcript variants

encoding different isoforms have been found for this gene.

Western blot analysis of Mouse kidney lysates, using TCF7 Ab. The lane on the left was treated with the antigen-specific peptide.

IMPORTANT: For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.

For Research Use Only. Not for use in diagnostic and therapeutic procedures. Not for resale without express authorization.
