beta-Actin Ab

References(151) Images(74)

Cat.#: T0022 Concn.: ~1mg/ml Mol.Wt.: 43KD
Size: Source: Mouse Clonality: Monoclonal

Application: WB 1:10000-1:320000, IHC 1:50-1:200, IF/ICC: 1:200

*The optimal dilutions should be determined by the end user.

Reactivity: Human, Mouse, Rat, Pig, Zebrafish, Bovine, Sheep, Rabbit, Goat, Guinea

pig, Dog, Monkey, Hamster, Duck, Chicken, Fish

Storage: Mouse IgG1 in phosphate buffered saline (without Mg2+ and Ca2+), pH

7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Stable for 24 months from date of receipt. Store at -20 °C. Stable for 12 months from date

of receipt.

Purification: Affinity-chromatography.

Immunogen: Full-length beta-Actin protein of human.

Uniprot: P60709

Description: beta-Actin is one of six different actin isoforms that have been identified.

The actin molecules found in cells of various species and tissues tend to be very similar in their immunological and physical properties. Therefore, Antibodies against beta-Actin are useful as loading controls for Western Blotting. However it should be noted that levels of beta-Actin may not be stable in certain cells. For example, expression of beta-Actin in adipose tissue is very low and therefore it should not be used as loading control for

these tissues.

Western blot analysis of various lysates, using beta-Actin Mouse Monoclonal Antibody at different dilutions. Western blot analysis of various lysates, using beta-Actin Mouse Monoclonal Ab at different dilutions

IF analysis of Hela with T0022 diluted at 1:500.

<code>TMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1% TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
